**Special shed roof tiles as custom-made products on request

Flexible technology – safe solutions

The best material for your work

With our ridge tile range, you can design a full-ceramic roof right to the top. And you'll have all the advantages on your side:

- Can be supplied in the colours of the Laumans tile range: in naturally fired, coated and glazed
- Completely meets the requirements drawn up for covering roofs with roofing tiles, and exceeds the requirements in many areas
- Made from the natural raw material of clay, for durable security against the effects of all types of weather without material fatigue

Individual production

In addition to universal hip caps that are used for roof pitches from 16° to 50°, we can also provide hip caps produced to your individual requirements.
