**Minimum roof pitch:** 30° with sub-roof  
**Standard roof pitch:** 40° according to ZVDH  
**Package contents:** 252 pcs on euro-pallet

# The original: a genuine clay tile makes history.

## Simply good: then and now

The basic shape of the **Hohlpfanne** (pantile) goes back to the ancient Romans. They were well aware of the value and beauty of fired clay. They used pantiles to protect their houses. Heavily curved and without interlocking joints, to this day it remains a simple method to give your house a matchless character and, at the same time, defy all environmental influences.

## The subtle difference

### Fore-cut coverage

Long cut **Hohlpfannen** (pantiles) used for fore-cut coverage. The successive rows of tiles overlap one another at a height determined by the size of the corner cut. This results in the upper right tile and the lower left tile abutting against each other diagonally at the four-tile corner.

The **HOHLPFANNE**  
Also available as short-cut version.

Short cut

**HOHLPFANNE**, short cut (for cut coverage)  
**Functional. Distinctive. Historic.**  
Living original made of clay.

**Dimensions:** approx. 414 x 247 mm  
**Covering length:** approx. 325 mm on average (approx. 315 – 335 mm depending on roof pitch)  
**Covering width:** approx. 220 mm  
**Required:** from approx. 13.6 pcs/m<sup>2</sup>  
**Weight per pc.:** approx. 2.9 kg  
**Minimum roof pitch:** 25 ° with sub-roof  
**Standard roof pitch:** 35 °  
**Package contents:** 252 pcs on europallet

## For historical buildings ...

Its wide distribution over the centuries makes the pantile the first choice today for restoring, renovating or modernising historical buildings. It adapts to the conditions of the roof surface like no other tile and fits coherently into a homogenous overall appearance.

## ... and modern build styles

This historical classic also goes extremely well with modern building styles thanks to the striking wave appearance of the roof.

The pronounced interaction of light and shadow is particularly beautiful in the deep curve of the tile and always puts your house in the right light in combination with four unobtrusive natural shades.

### Cut coverage

Short cut **Hohlpfannen** (pantiles) are used for cut coverage. The successive rows of tiles overlap one another at the minimum overlap height depending on the roof pitch. Four tiles overlap at the four-tile corner.

Your roofing craftsman can tell you which coverage is the right one for your building project.

Innovation built on tradition. Original Laumans clay tile roofs.

# Natural colours For a classical look.

No matter which colour best matches your house: the red, yellow, brown and grey tones of the Hohlpfanne always make a valuable contribution to the overall appearance of your real estate.

## Pure nature

In conjunction with the nuanced colour play of these purely natural products the vivid roof area effect of the **Hohlpfanne** underlines the occupants' vital claim to healthy living space and lifelong security.

## Natural red

Only fired clay tiles can be called "natural red". The appearance of this colour can vary, which produces an animated roof appearance.

## Natural Firing

This is a special production process to achieve particular colour shades. The main feature is that the colours go right through the whole tile, i.e. the tiles are throughcoloured. Adding the natural mineral titanium oxide to the clay mass produces yellow shades, whilst mixing in manganese produces the brown colour spectrum. The removal of oxygen during the firing process changes the natural red body completely into a grey shade, which we call braised blue.

A special process during firing evokes distinctly stronger nuances within the colours ,red reduced' and ,blackish blue nuanced' for an antique impression.

The resulting colours are unsurpassed in their lively appearance, showing distinct nuances and a particularly intense and natural interplay of colours which creates a uniquely beautiful surface effect.

## Show your colours

Do you already know Laumans' full colour and clay tile assortment? Apart from the Hohlpfanne we offer many other tile types in a great variety of colours. Pick "your" colour from exquisite shades of blue and green or elegant red, brown and black tones. Match your roof individually with your house.

# Your roof protects you. So protect your roof!

## Naturally made from clay

So that your roof can perform its various functions trouble free for generations, Laumans recommends the use of shaped parts made of clay. In that way, a system is obtained, which is known as the full-ceramic clay tile roof. A unit unbeatable in form and function, which defies all environmental influences and shows no material fatigue, even after decades. Naturally you can get the shaped parts in every possible colour and surface finish. Simply speak to your roofer or roof expert. He will gladly show you the various possibilities.

## Original Laumans clay tile roof

The illustration on the right shows in which areas of the roof a ceramic solution is to be striven for. Only the full-ceramic roof, from the eaves to the roof ridge, guarantees the unmistakable overall performance a Laumans of clay tile roof.

## Each roof a masterpiece

Whether new roofing, renovation or remodelling: with Laumans you also always receive a good feeling of being at home, besides the full-ceramic roof. No matter whether an ambitious architectural project or an economic building project is involved – a Laumans clay tile roof is always the right choice: Visually complete and technically perfect.
